

SwingCheck 0.7

Released October 7, 2026 · v0.7.0 to v0.7.1

Easier marking on a phone.

● What's new

- **Drag a point to move it:** a point that landed a little off can be dragged to where it belongs, with the magnifier showing as you move it. No more Undo and trying again.
 - **Pinch to zoom:** on a phone, pinch the frame to zoom in for a closer look at the ball, club, and hands, and pinch out to zoom back.
-

● Fixes and tweaks

- **v0.7.1:** Undo takes back your last action, so a point you moved goes back where it was.
